INTRODUCTION. Play is so important to optimal child development that it has been recognized by the United Nations High Commission for Human Rights as a right of every child. 1 This birthright is challenged by forces including child labor and exploitation practices, war and neighborhood violence, and the limited resources available to children living in poverty.

Measurement. Self-esteem is typically assessed using self-report inventories. One of the most widely used instruments, the Rosenberg self-esteem scale (RSES) is a 10-item self-esteem scale score that requires participants to indicate their level of agreement with a series of statements about themselves. An alternative measure, The Coopersmith Inventory uses a 50-question battery over a variety ...
