Risk perception is the subjective judgement that people make about the characteristics and severity of a risk. The phrase is most commonly used in reference to natural hazards and threats to the environment or health, such as nuclear power. Several theories have been proposed to explain why different people make different estimates of the dangerousness of risks.

Komet™ Amplification is proud to announce our very first pedal: the Komet OverDrive Amplifier, or K.O.D.A. — a massive sounding pedal with a stunning feature-set to boot. K.O.D.A. is a remarkably tunable pedal that offers an exceptionally amp-like overdrive structure with amazing gain-staging flexibility in 3 different circuit positions.

Social media have been battered in recent years by growing concerns about disinformation, privacy breaches, and the spread of harmful speech. This article itemizes the problems surrounding social media and political authority in the form of "three painful truths"—so termed because, although there is an emerging consensus around these points, many people are reluctant to squarely acknowledge ...

Molecular assays based on nucleic acid amplification techniques such as polymerase ...

WHO | The use of loop-mediated isothermal amplification

A bass amplifier or "bass amp" is a musical instrument electronic device that uses electrical power to make lower-pitched instruments such as the bass guitar or double bass loud enough to be heard by the performers and audience. Bass amps typically consist of a preamplifier, tone controls, a power amplifier and one or more loudspeakers ("drivers") in a cabinet.

Bass amplifier - Wikipedia

The Four-Stage Message Cycle. Based on my experience during the campaign, we developed a framework we called the Four-Stage Message Cycle. As part of our work, we quantified the relationship between advertising (gross rating points), ballot support levels (Gallup Daily tracking poll), and the content and volume of social media and traditional news coverage.
